

PROLIN Smart Suite 2024

Planned release Q4 2024

PROLIN Smart Suite 2024

Lightning-fast Performance Improvements

Seamless Support for HTML Email

Introducing PROLIN Concurrent User licenses for enhanced accessibility

Empowering Connectivity with REST API Templates and codes

Revamped Reporter for an intuitive and insightful experience

Performance Improvements

➤ What is the enhancement?

- ✓ PROLIN Smart Suite has been updated to use the latest .net framework (4.8.1) which brings with it performance improvements to all of the PSS components
- ✓ Upgrades to the latest UI Components which introduce the DirectX hardware acceleration.

➤ What is the benefit to you?

- ✓ .Net framework improvements will benefit all aspects of using the application, from UI to server-client communications.
- ✓ Hardware acceleration will leverage the computer's Ditect-X compatible graphics card to provide more fluent, more responsive UIs

Support for HTML email

➤ What is the enhancement?

- ✓ The email editor in PROLIN Smart Client will now support HTML email

➤ What is the benefit to you?

- ✓ You can now use HTML in your Service call Emails.

PROLIN Concurrent User Licenses

➤ What is the enhancement?

- ✓ PROLIN Smart Suite 2024 now supports PROLIN Concurrent User licenses (PROLIN Concurrent Client Access Licenses) in addition to the PROLIN Client Access Licenses (PCALs).

➤ What is the benefit to you?

- ✓ Your user community can grow leveraging the flexibility provided through concurrent licensing.
- ✓ This license model allows for multiple part time users to all share a pool of user licenses, thus providing a significant cost savings.

RESTAPI Templates & Codes

➤ What is the enhancement?

- ✓ The PPS REST API can now provide lists of available codes for a code type, or a property.
- ✓ The PPS REST API can now provide information about available templates and accept a template as an argument for a new item creation.

➤ What is the benefit to you?

- ✓ It is now much easier to create integrations with the REST API that have enough information to provide lists of values
- ✓ Items can now be created more easily and correctly with the application of templates on creation.

Reporter Redesign

➤ What is the enhancement?

- ✓ An overhaul of the design of reports, including new features, such as expressions and more.

➤ What is the benefit to you?

- ✓ PROLIN Reporter was introduced back in PROLIN 2020 with basic functionality, 2024 introduces many enhancements that make the solution a lot more practical for PROLIN customers to implement.
- ✓ Improvements have been made to allow for the easy creation of powerful reports.
